## **FULL CURL®** Mallard Decoys- Improvements 2006.

**If it looks like a duck & it swims like a duck...it must be a Full Curl !™**

Experiencing decoy shy birds? Use Full Curls to increase decoying success, especially on wary, late season ducks.

Give the ducks a **NEW LOOK:** Reduce ducks taking a spin over decoys, and experience them dropping in, because Full Curls look so real! The strong profile brings them in!

The high profile attracts from distances and the no-shine paint/finish, plus flocking, dispels wariness!

The Pro series decoys are foam filled and have durable flocking added to the head and tail. The flocking will outlast the paint and offers the same light reflection of real feathers. The foam makes them unsinkable, improves the ride on the water and eliminates the water slap noise. (Last years version with no foam has been discontinued.)

**There is no single decoy on the market that offers all the features of the NEW 'FC' custom decoys!**

**FC Features** **NEW glass look eyes**, with locking stems. No just glued on.  
FC's ride high on the water for better visibility, to enhance decoying.  
**Magnum size** for increased decoying power.  
Perfect paint scheme to match the actual duck.  
Durable **non-glare paint with texture**, enhances the exact feather detail of the decoy.  
Rotating heads, which snap in and stay in, to add natural variety to your spread.  
**Foam Filled.** With the textured surface, they look and ride like cork. No more sinking decoys

**NEW Keel Design** to enhance water ride. **Versatile Keel !**

**Increased size and ballast enables** the decoy to ride rough water like a real duck!  
Keel nose is also redesigned, but still has tie off on front, and back. **Strap weight hole too.**  
**Removable rubber plug** on keel end. Fill with water or ? for better ride on rough water.  
Remove the keel for use on ice, use in the fields, or on the water on windless days.

**Flocked heads and tails, on the drakes.**

Custom head color, emerald green fiber mix, for ultra realism  
White on the tail gives the sharp contrast to the black, for increased realism  
The sharp contrast of the B/W can be seen by the eye before anything else.  
White flocking give the save UV reflection of real feathers.

**NEW Box packs.**

**#1:** 4 Drakes/2 Hens; **#2:** 6 Drake Rester heads or **#3** 6 Drake Head Mix (3 Up, 1 Rester, 1 Feeder & 1 Caller.)  
Buying one of each style gives a fantastic realistic looking spread. Realism increases success.

**NEW Poncho (12 pocket) with gun straps and 6 pocket bags too fall 2006!**

**AO innovative products are not gimmicks, but truly realistic decoys to enhance hunter's success!**

**Full Curls offer the look of custom cork decoys at an affordable price.**

\***Paul Sullivan**\* has designed another winner! Paul tested them all season long, along with others, and the ducks choose the Full Curls over other deks, when set up in family groups, especially late season!
