2-Man

# Deadly Duck Blind

Be in the **HOT SPOT** daily.

**Location, location, Location.... Deadly Duck gets you there!**

*"The Deadly Duck makes Paul's Ponds successful, even late season. The birds think it is opening day again, when we move the blind! Hunters love watching the incoming birds and shooting ease."*

Paul Sullivan, Burbank Guide Service [www.burbankgoose.com](http://www.burbankgoose.com)

**NEW and improved. Aero has totally re-designed their blind to increase ease of use.**

\*\*Lighter weight for ease of portability

\*\*Dead Grass colored textured flat powder coat blends into most settings.

\*\*Quick assemble panels, with quick connector pins, makes set up at 'O'dark thirty easy.

No small parts to loose. Enables hunter to be in the HOT spot daily.

\*\*Modular design. Just add blinds to increase the number of hunters. Ends are interchangeable.

**Ultimate hide \* Portable \* Quick Assembly \* Ease of shooting \* Fools late season birds**

Superior hide allows for closer shots, which produce greater accuracy with more discriminating shots.

Great for young or experienced hunters. Ample room for hunters, dogs & gear. Easy to transport, or move daily.

**Design:** The pitched roof design and natural camouflage creates the superior hide, which fools wary birds. No un-natural shadows or other man-made elements to tip off the birds. Great for weekend hunter or club blinds.

The EZ-FAB mesh pane covering, with added natural materials, allows your silhouette to truly disappear. Plus the EZ-FAB Mesh allows for increase visibility to see the birds approaching and know when to call the shots.

**Camouflage:** Just add natural materials for camouflage and disappear from the birds eye! Appears natural with a little vegetation and offers one way vision. Eliminates the boxy look and allows some light penetration.

**EZ-FAB Mesh:** Superior to flat camouflage materials or hard to see through mats, which educated birds recognize. New diamond pattern allows for easier insertion of natural materials. Made of durable UV resistance poly in matching Dead Grass color.

**Shooting Options:** 3-way Trap/shooting Door. Leave open and brush up for early season or

flip out for quick shots. Or slowly drop into the blind, which does not alert the ducks and allows the hunters to slowly rise to shoot. Quiet latch to not flare the birds.

**Shooting Ease:** Designed for hunter ease to increase success; allows the hunter to sit in comfort and stand to shoot.

Also the hunter can identify the specie and gender of the ducks, as they com closer.

**Retrieving:** Plenty of room for fido in the blind. End access door allows for quick retrieving and return.

- Affordable. Less than a one man lay out blind!
- $\frac{1}{2}$  " rugged steel frame panels for years of service.
- EZ-FAB mesh is attached to the panels. Weighs 30 pounds.
- Quick connect pins included. Additional with nut and bolt package included for permanent/seasonal set ups.
- Almost ready to hunt. Just attach the hinges and closures.
- Versatile. Access door on hunters left, when inside the blind. Door can be changed to opposite end, when using 2 or more blinds together.
- Optional brackets can be used on non-door end instead of strut and EZ-FAB covering, which will allow for pass through from first to second blind.
- Panels stack for transport or storage. (Chairs are not included.)

**SEE and not be SEEN. Know when to call the shot!**

Watch the birds work and know when to call the shot. Superior hide!

Just moving as little as 75 feet will fool wary late season birds.
